

STB NEWSHEET

DENSE PHASE

PNEUMATIC CONVEYING

STB designed and supplied some of the first Dense Phase conveying systems 30 years ago. STB held the license from the Warren Springs Laboratory (Department of Trade & Industry) to produce Dense Phase Systems in accordance with proven design data. Over the years STB have been continuously improving & adapting the system & now offer systems including Pulse Phase, Dune Phase, Medium phase & Dilute Phase.

Picture above and below: Dense phase conveying pots designed and supplied by STB for various powder conveying systems.

Systems are manufactured and tested in STB factory. STB have a test rig and are able to trial products to verify conveying capabilities.

Installation and commissioning is carried out using our experienced engineers
