

- STB specialise in bulk materials storage and conveying.
- Our products are designed and manufactured in house.
- Stainless steel food quality manufactured items are our speciality.

North view of factory hall No 1 (31m x 16m) with overhead cranes

STB's manufacturing facility at Stroud. With over 30 years experience in manufacturing silos, vessels and conveying systems our workforce has the right experience to produce high quality work including food quality stainless steel fabrications.

South view of factory hall No 1. Factory hall No 2 is 24m x 11m

Picture below showing specialist stainless steel fabrications

Vessels, pneumatic conveying system and platform support steel. Designed and fabricated in food quality stainless steel. The system was pre-assembled in our factory for inspection. After inspection the system is re-assembled on site for final installation.

With a total of 920m² of floor and office space on a site of approximately 1 acre STB have the capacity to undertake small and large process system design and manufacture.

Equipment includes: 2 m rolls, 3m brake press, radial drills, saws and overhead cranes with 9T lifting capacity.
